

GOOD EYE!

If your eye is good, your whole body will be full of light. If your eye is bad, your whole body will be full of darkness (in Mt. 6:22-23). The good eye is singly focused on seeing things according to God's will, the way God wants you to see things, the only way to be truly objective about what you are seeing. You have a mind-set of focus on God's ways, not the world's. You flood yourself with light, spirit, soul, and body. A bad eye focuses on darkness and stays mad at it. What your eye focuses on, you think about and it fills your body. It is so joyous and healthy to have your body filled with light by having a good eye. If your body is not filled with light it is time to receive Jesus as God intends and have an eye change.
